Prepositions

A preposition is an important word used with a noun or noun equivalent to show its relation with some other word in the sentence.

- **In** - 'In' is generally used before the names of countries and large cities, or before the name of the place in which one is at the time of speaking:
in a country, in town
- **At** - 'At' is used when there is a small extent of space or time. When we refer to small towns or villages, we use 'at'. 'At' means inside, just outside or just beside the building.
- **In, into** - 'In' denotes position of rest inside something; while 'into' denotes motion or direction towards the inside of something.
- **On, At, In (for time)**

On is used with the days of the week or month:
on Sunday, on March 28

At is used with exact time:
at five, at midnight

In is used with a period of time:
in the evening, in 1970

All, Any, More, Most, Some

Relative Pronouns

NOTES

A relative pronoun (who, which, that) used as a subject takes a singular or plural verb according to its antecedent.

- Measles is among the diseases that are curable.
- This is only one of the local papers that prints a weekly horoscope.

Singular Verb

The following words and their compounds are always singular and require a singular verb.

- body (anybody, everybody, nobody, somebody)
- thing (anything, everything, nothing, something)
- one (anyone, everyone, someone, no one)
- Something is wrong with him these days.
- Everybody in the office has tickets.
- Nobody knows the trouble I have seen.
- Everyone is required to clear their dues.
- No one is entitled to special treatment.

Stop Smoking

In my opinion smoking is a bad habit. First, when smoking people can get lung cancer, many breathing problems and diseases. and of course it will become more dangerous when it gets to the air it will cause pollution and smog, so smokers need to quit. And smoking cigarettes is one of the most dangerous habits for your health, millions of people who smoke or those who breathe in the polluted air are at risk. Anyone who starts smoking could become addicted to it therefore, it's very hard to quit.

Smoking

Tobr. is the most dangerous thing that affects our health negatively. If you consume it daily you provok health problems such as heart attacks, asthma and even lung cancer. Be careful about your safety. Smoking is very common and fashionable, especially among young boys. This habit usually begins at school when boys try to experiment with every new thing. Despite the warning given by doctors about the harmful effects of smoking people continue to smoke. Smokers are addicted to it, and even if they want to give up, they cannot.

Smoking is one of the biggest issues in the world due to its harmful effects on health and look. So what are these effects?

Indeed, people who smoke suffer from serious health problems. First of all, heart diseases or all sorts of cancers are the worst effects. Second, a person who smokes loses appetite and often suffers from stomachache. As a result, he always feels in a bad health state. In addition to that, smoking has also psychological problems such as: nervousness and insomnia.

As it has effects on health, smoking has also a bad influence on appearance it means that smokers lose weight and look tired. Besides, they look old at an early age. To add more, we observe that smokers have black teeth and blue lip.

In brief, Tobacco consists a big danger on public health in a way that every year millions of people die because of smoking. So we have to make an effort to put an end of its spreading.

→ Cigarette smoking causes environmental pollution by releasing toxic air pollutants into the atmosphere. The cigarette butts also litter the environment and the toxic chemicals in the residues seep into soils and waterways, thereby causing soil and water pollution, respectively.

on The Environment

Health and Environment

- * Air and land Pollution
- * Smoking negative effects:
 - Smoking causes cancer, heart disease, stroke, lung diseases, diabetes, and chronic obstructive pulmonary disease (COPD), which includes Emphysema and chronic bronchitis.

Smoking also increases risk for tuberculosis, certain eye diseases, and problems of the immune system, including rheumatoid arthritis.
